Ministry of Labour Borrowers:

Photocopies of journal articles may be requested by filling in the margin numbers from the bulletin and returning this form to the library with your full name, branch and mailing address. Books should be borrowed in person by staff at 400 University Avenue, and 434 University Avenue.

Non-Ministry of Labour Borrowers:

Books must be borrowed through your local library using the standard Inter-Library Loan Request Form. The library reserves the right to limit non-Ministry loan of items in heavy demand.

Journals should be borrowed from your local library whenever possible. Requests for items from commonly held journals will not be filled. To obtain single photocopies of other articles for research purposes the margin numbers should be listed and the request form returned with your full name and mailing address. The Ontario Ministry of Labour Library has implemented a charge of 12 cents per single page for all non-Ontario government personnel; minimum charge \$5.00 per order, unless requested through Inter-Library Loan.

INTERLIBRARY LOANS

To enable the library staff to cope with the increasing demand for interlibrary loans Ministry personnel are requested to observe the following rules.

Interlibrary loans should be directly related and essential to an employee's work. A minimum of two weeks should be allowed for an item to be obtained. A new form has been designed to facilitate filling requests and should be filled out in full for each item. A supply of these will be sent to regional offices and laboratories. Others may obtain forms from the library. Books must be returned to the Labour library at least two days prior to the due date at the original lending library. The library will charge back overdue fines but please remember that overdues discredit the library and future requests may be refused.

Outside libraries borrowing from the Labour library should continue to use standard CIA interlibrary loan forms or Ontario Government Interministerial ILL forms. There is still no charge for this service but the library will not lend valuable material unless messenger pick-up and delivery services are provided.

Photocopies of journal articles may be requested by filling in the margin numbers from the bulletin and returning this form to the library with your full name, branch and mailing address. Books should be borrowed in person by staff at 400 University Avenue, and 434 University Avenue.

Non-Ministry of Labour Borrowers:

Books must be borrowed through your local library using the standard Inter-Library Loan Request Form. The library reserves the right to limit non-Ministry loan of items in heavy demand.

Journals should be borrowed from your local library whenever possible. Requests for items from commonly held journals will not be filled. To obtain single photocopies of other articles for research purposes the margin numbers should be listed and the request form returned with your full name and mailing address. The Ontario Ministry of Labour Library has implemented a charge of 12 cents per single page for all non-Ontario government personnel; minimum charge \$5.00 per order, unless requested through Inter-Library Loan.

LIBRARY REFERENCE SERVICE

Fran Krayewski, our reference librarian, whose subject specialty was employment standards, human rights and related areas, has resigned. She will be greatly missed and we all wish her happiness in her new position at the Imperial Oil Library.

Library school students will be helping to staff our reference desk for the next few weeks. It may be necessary for library clients to leave requests for reference service until a regular staff member is available. New reference request forms are available for this purpose and we hope their use will facilitate service. (Sample enclosed).

Library News

Staff Changes

A temporary staff reorganization will become effective August 1st, for approximately eight months, while the study of library services and procedures continues.

John Wilson will begin a special assignment to study automation procedures for cataloguing, periodicals control, journal indexing, bulletin production, etc.

Ron Squires of the Systems and ADP Branch will also be working on this project.

Gilliam Simpson will replace John as the occupational health and safety reference librarian. She has a Bachelor of Environmental Studies degree from the University of Waterloo and a Master of Library Science degree from the University of Toronto. She has worked at the Waterloo University Library and has been temporarily replacing the librarian at the Industrial Accident Prevention Association.

Jane Jones will work at the front desk as receptionist and circulation clerk. She has a B.A. from the University of Toronto and completed her first year of library science at U.B.C.

Library Hours

Library users are reminded that the library is open from 9 to 5, Monday to Friday, for circulation and for individual study. Reference service at the reference desk or from subject specialists is available only from 9:30 to 3:30. Reference requests, including telephone calls, should be restricted to those hours. This is particularly important now as we will have new reference staff and our summer library school assistants will be leaving, reducing the total reference staff. Reference staff are also responsible for book selection, assigning of classification numbers and subject headings, journal indexing, Bulletin production, special bibliographies, and computerized data base searching, thus restricting the number of hours available for public service. Quality of reference service depends directly on these other aspects of library service.

Legislative Library - Policy Changes

Personal borrowing privileges of civil servants at the Legislative Library will be rescinded and any future borrowing must be done through interlibrary loan from Ministry libraries. The Ministry of Labour Library interlibrary loan service is already experiencing difficulties handling the volume of incoming and outgoing interlibrary loans. Ministry personnel requiring essential material from the Legislative Library should fill out complete information on an ILL request form and allow at least 2 weeks to obtain the loan.

Additions to the library and a selection of recent journal articles indexed.

Review of Service policy

Library service policy will be studied for the next three months by Susan Klement of Information Resources. She will be considering the extent of library service of what quality and to whom it should be provided. This will involve examining such areas as collection development, circulation procedures, reference service, journal indexing and the Library Bulletins. She will be requesting interviews and suggestions from a variety of library users. Comments from Bulletin recipients will also be very welcome.

Canadian mining data base now on-line

MINTEC, the data base for mining technology prepared by CANMET has recently become available online through QL services. This is an excellent source of references to mining reports and journal literature with considerable emphasis on Canadian material. Searches, in batch mode, by mail were previously available from CANMET information centre in Ottawa. Staff of the Mining Health and Safety Branch should note that all MINTEC searches must now be done by the reference staff at 400 University Ave. on the Library's computer terminal.

Database searching

On-line data base searching is available in the library from Medline, SDC (Infomart), Lockheed, CAN/OLE, QL, and New York Times. These cover over 150 individual bases. Search costs are increasing and some bases are quite expensive to use. Budgetary restrictions and staff time available require that certain guidelines be adhered to:

1. The Library's own reference collection, catalogue and journal indexes should always be consulted first. These are more current than any on-line data base and material is available immediately without delay for off-line printouts and interlibrary loans.
2. A request form should be filled out showing clearly what is required with limitations to restrict the search to a reasonable and relevant result, e.g. language, date span, human or other species, etc. Ministry personnel from regional offices may telephone requests and librarians will search our own resources first, supplementing them with on-line searches when necessary.
3. Choice of data base(s) should be left to the librarians. Searches will be assigned to a specialist in the appropriate subject and base. Please do not ask to observe the search--our computer terminal room is very congested, we do not have a CRT screen, some bases cost less and are more responsive at off-hours. Librarians also accumulate searches and save on-line time by running several while on the base.
4. For searches on some bases an estimate of cost will be made and approval will be required from the head of Reference Services, or the Head Librarian. Extensive on-line printing will be done only for emergencies and must also have prior approval. At least two weeks should be allowed for searches. Off-line printouts by mail often take 10 days or more to arrive.
